BC Major Projects Inventory is published quarterly by the
Ministry of Jobs, Tourism and Skills Training.

Not all major projects in British Columbia are included in
the MPI. For inclusions, projects must be made known to
the publisher.

By definition confidential project information is not
included.

While information sources are checked regularly, the
Government of British Columbia and its contractors are not
responsible for any errors or omissions in this publication.

Definitions of Key Terms

Proposed – project is in planning or permitting stages,
remediation, demolition, excavation or site servicing may
occur at this stage.

On Hold – Project is delayed but still may go ahead or is
cancelled and will be removed from the MPI in the following
issue.

Construction Started – foundations have started, includes
excavation for road projects.

Completed – construction is substantially complete,
landscaping or deficiency inspection may still occur.

Public – projects that have funding from municipal,
provincial or federal governments and may include private
funding.

Clean Energy – describes projects that are clean energy
producers, such as wind power or hydroelectric.

Green Building – projects that are planned to Leadership
in Energy and Environmental Design (LEED) or Green
Globes sustainable building standards.

About the Major Projects Inventory

The BC Major Projects Inventory (MPI) contains summary information on major projects in the Province of British Columbia, Canada, that are over \$15 million (Cdn.) capital cost, or \$20 million in the Lower Mainland–Vancouver area. As of June 2010, the information in this published version of the BC Major Projects Inventory is prepared by Rene Corcoran, although it is now owned and published by the Province of British Columbia.

Sources of MPI Information

Information sources include print and electronic media, developers, architects, general contractors, and government agencies (provincial, regional, municipal) as well as occasional site visits. Projects that are under consideration or proposed to be funded by the Provincial government may be listed where there is public information about such projects. The description may indicate the status of Provincial funding applications, if it is known.

Project Location

Projects are listed within the eight regions: Vancouver Island/Coast, Mainland/Southwest (Vancouver area), Thompson/Okanagan, Kootenay, Cariboo, North Coast, Nechako, and Northeast. Maps showing the location of the regions and main population centres are included in the MPI. Projects are also listed according to the nearest population centre, which could be an unincorporated centre or a local government, (e.g., a municipality).

Updates

New projects are added to the database every quarter. Projects already in the database are updated, at minimum, every six months unless there is no expected change in status for a longer period of time. Projects may be shown as updated with no change in information—this means that the information shown is still valid according to the verifying source.

Estimated Costs

Cost estimates are general estimates from the information sources used.

Start and Finish Dates

Start and finish dates for proposed projects are based on estimates from the sources used, or in some cases, on reasonable assumptions. These dates are revised as new information becomes available.

Project Status

Projects are listed by status: proposed, under construction, completed, or on hold. Notes on other status indicators are also included in the project description. Projects that are on hold for longer than two years are normally removed from the publication (although retained in our database). Cancelled projects are noted in the project descriptions as cancelled, then removed from the next issue of the MPI.

Sustainable Building Design

As a new feature, the MPI has begun identifying sustainable building design and construction projects within that have been registered and certified under a recognized green building rating system (e.g., LEED®, Green Globes). Certification provides greater assurance that a building will be an environmentally responsible, energy efficient, profitable, and healthy place to live, work and play. This designation has been added to the project description to promote awareness of the benefits of green buildings.

Highlights of the June 2014 Issue

This issue of the BC Major Projects Inventory lists 25 new proposed projects over \$15 million for the second quarter of 2014, with available capital cost estimates totaling approximately \$34.4 billion in potential new capital investment, if all the projects proceed.

Twenty-one major projects started construction in the second quarter, with an estimated value of \$1.7 billion. The largest project started at \$420 million was the Upper Lillooet River Hydroelectric Project in Pemberton, followed by the \$240 million Port Mann Water Supply Tunnel in Vancouver, and the \$200 million Skaha Hills Development in Penticton.

Twenty projects completed construction in the second quarter, with an estimated capital cost of approximately \$2.4 billion; the largest project is the \$746 million Northwest Transmission Line (NTL) in Terrace, followed by the \$575 million Highland Valley Copper Modernization in Logan Lake.

All capital costs are estimates, and therefore, subject to changes, especially in the early stages of a project proposal. Some capital costs are not included because they were not available at press time or the developer/owner requested that no capital cost be shown.

The capital cost of all major projects currently under construction in BC is estimated at \$82.6 billion, down slightly from the \$84.2 billion reported in the first quarter of 2014. Many major project proposals listed are in very preliminary stages and are not approved for construction, therefore capital cost estimates should be viewed with caution. The available capital cost of proposed projects is estimated at approximately \$236.5 billion, up from \$206 billion in the previous quarter. Approximately \$22.8 billion of projects are judged to be 'on hold' for the time being.

John Hart Replacement

BC Hydro Ph: (604) 623-4472 Toll Free: 1-866-647-3334
The purpose of the project is to replace the existing John Hart Generating Station. The existing six unit, 126 MW generating station, located on Vancouver Island near the community of Campbell River, has been in operation since 1947. The age and condition of the John Hart facility indicate the need for significant capital investment in the powerhouse and penstocks to ensure reliable generation from the facility in the long term and to mitigate seismic and environmental risks. The new facility will provide an additional 12 MW capacity (from 126 MW to 138 MW) and approximately 10 per cent additional "resource smart" energy from the same amount of water. BC Hydro applied to the BCUC for a Certificate of Public Necessity and Convenience (CPCN) for this project and this was approved by BCUC in February 2013. InPower BC has been selected to construct the underground powerhouse.

A new 10-lane bridge across the Fraser River between Coquitlam and Surrey, selected in favour of the initial plan for the twinning of the Port Mann Bridge. The new span will have provision for a RapidBus service, future light rapid transit and pedestrian/cyclist network. The project will include widening Hwy 1 west to McGill St in Vancouver by one lane each way, and east to 216 St in Langley by two lanes each way and upgrading the associated interchanges to current standards. The Connect BC Development Group (which includes the Macquarie Group, Transtoll Inc, Peter Kiewit Sons and Flatiron Constructors Canada) have been selected for this contract. The bridge will be funded through electronic tolls and financing will be provided by the Provincial government (\$1.375 billion), the proponent (\$1 billion) and bank financing (\$1.15 billion). The project is certified under the Environmental Assessment Act. The new Port Mann Bridge phased opening with 8 lanes in Dec 2012, the highway widening to Langley has completed. New Cariboo Rd overpass is expected to complete Aug 2014. Website: www.pmh1project.com

Mica Gas SF6 Insulated Switchgear Replacement Project

BC Hydro Ph: (604) 623-4472 Toll Free: 1-866-647-3334
This project is to replace the existing 500 kV SF6 GIS switchgear system at the Mica Generating Station and install additional SF6 GIS necessary to accommodate the future addition of Mica Units 5 and 6. When completed the system will use three 500 kV circuits to conduct the energy from the Mica underground powerhouse to the surface, where it transitions to transmission system. Replacement of the existing switchgear system will maintain the level of reliability of this key generating station and have the additional benefit of reducing SF6 (a greenhouse gas) leakage. The new switchgear system will also accommodate the future addition of the Mica Units 5 and 6 generators.

STATUS: PROPOSED

Alice Arm

Kitsault Mine Project

Avanti Kitsault Mining Inc. Ph: (604) 870-1688
Proposed open pit molybdenum mine located 140 km northeast of Prince Rupert. A pre-feasibility study completed in Dec 2009 estimates extraction of 40,000 tonnes of ore/day. Included in the project will be mill processing, ancillary facilities and a possible 9.8 MW run-of-river hydroelectric project. Project has been certified under the Environmental Assessment Act. An agreement has been reached with Nisga'a Nation. A Mines Act permit has been issued and a Federal Environmental Assessment was issued on Jun 27, 2014. Road and camp construction has commenced with an Occupant License to Cut permit.

STATUS: PROPOSED**Atlin****New Polaris Gold Mine**

Canarc Resource Corp. Ph: (604) 685-9700
 Reactivation and expansion of a former underground gold mine approx 100 km south of Atlin and 60 km east of Juneau, Alaska. Re-modeling, metallurgical testing and engineering of a portion of the gold resources, necessary for a 65,000 opy high-grade underground gold mine, is underway. A scoping study identified the potential to develop a 65,000 oz/year to 100,000 oz./year high grade, underground gold mine over the next three years. New office and refurbished camp complex now on site. New mine resource estimate released on Feb 2007 and the mine plan is expected to complete in Spring 2007. A feasibility plan and environmental studies will be carried out prior to government permitting. Website: www.canarc.net

 Proposed nickel mine located 70 km east of Dease Lake. An updated Preliminary Assessment (PA) of the Turnagain deposit by engineering firm AMEC Americas Limited showed positive economics with a potential 27 year mine life, producing an average of 20,397 tonnes of nickel per year. The ore would be processed through an on-site concentrator and hydrometallurgical process facility that would produce nickel, cobalt and copper precipitation products. Project is in the pre-feasibility stage and will require review under the Environmental Assessment Act. Website: <http://www.hardcreek.com>

Site C Clean Energy Project

BC Hydro Ph: (604) 623-4472 Toll Free: 1-866-647-3334

Site C is a proposed third dam and 1,100 megawatt hydroelectric generating station on the Peace River approximately 7 kilometres southwest of Fort St. John. It would be capable of producing approximately 5,100 gigawatt-hours of electricity annually and would deliver firm electricity with a high degree of flexibility. The Site C project is currently undergoing a cooperative federal-provincial environmental assessment, which is expected to be completed in the fall, 2014. Subject to approvals, Site C would provide clean, reliable power to B.C. for more than 100 years. *Planned in-service date for all units. This timeline reflects the project's current regulatory schedule and is subject to change based on a review of the construction schedule.
